Re: Critical Incident Management (SEMS and NIMS) and Local Hazard Mitigation Plan Update

Department of Homeland Security developed the National Incident Management System (NIMS) at the federal level. California uses the Standardized Emergency Management System (SEMS). The use of both the SEMS and NIMS provide an effective, systematic, and standardized approach to managing critical incidents of any size. The Incident Command System (ICS) is the primary component of both systems.

POST as developed an overview of both SEMS and NIMS using a panel of subject matter experts from the law enforcement, fire, and emergency management fields who provide insight and comments on the use of these systems to manage incidents that occur frequently in California and the nation.

Please review some of the below example showing the use of SEMS. This is not for POST credit just a refresher.

“HS Critical Incident Management (SEMS and NIMS)”

<https://lp.post.ca.gov/>

- CHP Response to Hurricane Katrina (20 min.)
- Los Angeles Civil Disturbances in 1992 (9 min.)
- Cedar Fire, San Diego County in 2003 (14 min.)
- Foxboro Incident, Irvine (14 min.)
- Alaska Air #261 Crash, Ventura County (11 min.)
- Metro Link Train Crash, Glendale (16 min.)
- Reagan Funeral, Ventura County (10 min.)
- Rose Parade/Rose Bowl, Pasadena (11 min.)

- Value of NIMS/SEMS and ICS (10 min.)
- Final Thoughts (6 min.)

Example of ICS system organization

Supervisors should familiarize themselves with FEMA forms and location.

Also, to be reviewed 409.5 PC

409.5 PC (a) Whenever a menace to the public health or safety is created by a calamity including a flood, storm, fire, earthquake, explosion, accident, or other disaster, officers of the Department of the California Highway Patrol, police departments, marshal's office or sheriff's office, any officer or employee of the Department of Forestry and Fire Protection designated a peace officer by subdivision (g) of Section 830.2, any officer or employee of the Department of Parks and Recreation designated a peace officer by subdivision (f) of Section 830.2, any officer or employee of the Department of Fish and Game designated a peace officer under subdivision (e) of Section 830.2, and any

publicly employed full-time lifeguard or publicly employed full-time marine safety officer while acting in a supervisory position in the performance of his or her official duties, may close the area where the menace exists for the duration thereof by means of ropes, markers, or guards to any and all persons not authorized by the lifeguard or officer to enter or remain within the enclosed area. If the calamity creates an immediate menace to the public health, the local health officer may close the area where the menace exists pursuant to the conditions set forth in this section.

(b) Officers of the Department of the California Highway Patrol, police departments, marshal's office or sheriff's office, officers of the Department of Fish and Game designated as peace officers by subdivision (e) of Section 830.2, or officers of the Department of Forestry and Fire Protection designated as peace officers by subdivision (g) of Section 830.2 may close the immediate area surrounding any emergency field command post or any other command post activated for the purpose of abating any calamity enumerated in this section or any riot or other civil disturbance to any and all unauthorized persons pursuant to the conditions set forth in this section whether or not the field command post or other command post is located near to the actual calamity or riot or other civil disturbance.

(c) Any unauthorized person who willfully and knowingly enters an area closed pursuant to subdivision (a) or (b) and who willfully remains within the area after receiving notice to evacuate or leave shall be guilty of a misdemeanor.

(d) Nothing in this section shall prevent a duly authorized representative of any news service, newspaper, or radio or television station or network from entering the areas closed pursuant to this section.

City of Emeryville Local Hazard Mitigation Plan Update

The preservation of life, property and the environment is an inherent responsibility of local, state, and federal governments. The Disaster Mitigation Act of 2000 (DMA 2000) requires that all state and local governments develop a hazard mitigation plan as a condition of receiving federal disaster assistance. These plans are required to be updated every five years.

The City of Emeryville 2009 Local Hazard Mitigation Plan and this 2019 update is our effort to identify and evaluate all potential natural and man-made hazards which may affect the City of Emeryville and to present mitigation strategies that the City can take to address the hazards identified. This is only one of many steps the City of Emeryville is taking to protect the welfare of our residents as well as the natural and cultural resources of our community. The City embarked on this plan update in March 2015. The community was afforded multiple opportunities to participate in the planning process.

Members of the public were also encouraged to become part of the Local Hazard Mitigation Plan Update Planning Team. The Local Hazard Mitigation Plan Update Planning Team convened in June 2015 and consisted of representatives from the City Manager, Human Resources, Community Services, Community Development, Public Works and Police Departments, as well as a representative from the Alameda County Fire Department and two community members. The planning team met seven times over the next 12 months.

The following plans, studies and reports were used in the development of the 2019 Local Hazard Mitigation Plan

<http://www.ci.emeryville.ca.us/DocumentCenter/View/10132/Local-Hazard-Mitigation-Plan-Update-2019---2024-Final>

Please review the Hazard Analysis with your teams as information only. The link may be used or printed out copy is in the Sergeants Office. This is a City-wide effort and further planning is currently being worked on.
